**Location:** North Jeremiah

---

## Summary

Passionate programmer with over 5 years of experience in software development, specializing in C++, MongoDB, and Redis. I thrive in dynamic environments, focusing on building scalable solutions and optimizing performance. My goal is to leverage my skills in a challenging role that fosters growth and innovation.

---

## Skills

- **C++:** Expert level with extensive experience in developing high-performance applications.
  - **MongoDB:** Advanced proficiency, capable of designing complex data models and ensuring optimal database performance.
  - **Redis:** Advanced skills in caching strategies and real-time data processing.
  - **Go:** Intermediate knowledge with hands-on experience in building microservices.
  - **Kubernetes:** Beginner level, currently exploring container orchestration and deployment strategies.
-

# Professional Experience

## Software Developer

**Tech Innovations Inc.**

*North Jeremiah*

*June 2021 - Present*

- Developed a **Data Analytics Dashboard** that improved data retrieval times by 30%, enhancing user experience and data visibility.
- Collaborated with a team of 5 to create a **Microservices Architecture**, reducing deployment times by 50% through efficient service orchestration.
- Implemented Redis caching solutions that led to a 40% reduction in database load.

## Full Stack Developer

**Creative Solutions LLC**

*North Jeremiah*

*March 2018 - May 2021*

- Led the development of a **Web Application** that increased client engagement by 25%, using C++ and MongoDB for back-end services.
- Worked on integrating third-party APIs, resulting in a 15% increase in application functionality.
- Participated in code reviews and mentoring sessions, fostering a culture of continuous improvement within the team.

---

## Projects

- **Data Analytics Dashboard:** A web-based platform for visualizing data trends and metrics, developed using C++ and MongoDB.
  - **Microservices Architecture:** Designed and implemented a scalable microservices architecture that improved system reliability and performance.
  - **Web Application:** Developed a user-friendly web application that streamlined business processes and enhanced operational efficiency.
-

## Certifications

- Certified MongoDB Developer
  - C++ Certified Associate Programmer
  - Go Programming Language Specialization (Coursera)
- 

## Personal Interests

In my spare time, I enjoy contributing to open-source projects and staying updated with the latest technology trends. I also love hiking and exploring nature, which helps me recharge and stay creative in my programming endeavors.
